Real estate agency

Description:

The application will allow users to search for proprieties using a multitude of filters in order to make the search more exactly and then to view them and eventually to make an appointment to see that place live with one of the real estate agents.

The platform also supports employees they can see for what places are responsible and what schedule they have (like team meetings or if he have to present a proprieties).They also can receive tasks (like some other employee can assign a task to a real estate agent) or they can request to be responsible for a certain property(request task). Employees will have a performance tracker. Employee can add / edit / detele post with proprieties
